

AgOptic

Crop Management Solutions

AgOptic™ provides you with a scouting program that you can count on; when you need it, where you need it. The structure provided by a program like AgOptic gives you something that you depend on to meet the increasing demands of crop production so that you can be confident and rest assured knowing your needs are addressed in the field.

In addition, you will be provided with both electronic and paper reports for historical reference and quick access to key information. This enables you to have more confidence you're making the right decision for your operation. AgOptic™ provides the ultimate in crop scouting services combined with the new technology of today.

- ✓ Scouting records stored geographically
- ✓ Timely scouting reports
- ✓ Digital report capabilities
- ✓ Crop based scouting routine
