

USDA WASDE REPORT | AUGUST 2022

AUGUST 12 WASDE REPORT IS A SHOCKER, SENDING FUTURES UP THE LIMIT!

The USDA projection of the U.S. crop defied all expectations at 12.570 million bales down almost three million bales from the July 12, 2022, report.

THE 2022/2023 MARKETING YEAR

The August 12 USDA World Agricultural Supply & Demand Estimates (WASDE) for 2022/23 marketing year put U.S. ending stocks down by 600,000 bales and world ending stocks down 1,494,000 bales from the

July 12 estimate.

United States Supply and Demand: The U.S. numbers show a decrease in production of 2,930,000 bales, and a decrease in exports of 2,000,000 bales. U.S. domestic use is down by 200,000 bales from last month. The U.S. Ending stocks at 1.8 million bales indicates a stocks-to-offtake ratio of 12.6 percent - the lowest ratio recorded in recent history. In July 1995, the stocks-to offtake

ratio was 12.9 percent, but the domestic use was 11 million bales. This is the lowest absolute number since July 1991 when stocks were 2.3 million bales.

The NASS projection of U.S. production by states shows Texas, Oklahoma, and Kansas with an abandonment of 69 percent and average yield of 621 pounds per harvested acre. This puts total Southwest production at 3.3 million bales. Missouri also shows a high abandonment at 16 percent with a projected yield of 975 which is about 20 percent below average.

Global Supply & Demand: The WASDE estimates show a decrease in 2022/23 global production of 3,052,000 bales, and a decrease in 2022/23 global consumption of 839,000 bales.

Global production for 2022/23 is projected to be higher in Kazakhstan (25,000); but lower in Bolivia (2,000), Tajikistan (-20,000), United States (-2,930,000), Uzbekistan (-100,000), and Zimbabwe (25,000). Notably, India production was unchanged. Consumption is seen to be higher in Poland (3,000), and Tajikistan (15,000), but lower in Turkey (100,000), United States (-200,000), Uzbekistan (-50,000), and Vietnam (-200,000). The WASDE projects imports will be higher for Greece (5,000), and Poland (4,000), but lower in Bangladesh (-100,000), China (-1,000,000), Colombia (-5,000), India (-200,000), Pakistan (-200,000), Turkey (-100,000), and Vietnam (200,000).

THE 2021/2022 MARKETING YEAR

The USDA WASDE report for the 2021/22 marketing year put U.S. ending stocks up by 100,000 bales and world ending stocks up 685,000 bales from the July 12 estimate. The U.S. numbers show no change in production, a decrease in exports of 100,000 bales and U.S.

domestic use unchanged from last month.

The WASDE estimates show a decrease in 2021/22 global production of 262,000 bales, and a decrease in 2021/22 global consumption of 575,000 bales.

Global production was lowered in Brazil (-300,000), and Tajikistan (-25,000). Consumption is higher in El Salvador (5,000), Honduras (10,000), Japan (5,000), Peru (20,000), Thailand (10,000), Turkey (100,000), and Uzbekistan (50,000); but lower in India (-500,000), South Korea (-10,000), Mexico (-50,000), Pakistan (-100,000), and Vietnam (-100,000).

MARKET IMPACT

A U.S. ending stocks number of 1.8 million bales is an impossibly low number. Therefore, the U.S. market price will ration the supply. December 2022 futures wasted no time with that task climbing five cents in 15 minutes to lock up the limit at \$1.0859.

In the 31 days since the last WASDE report on July 12, Dec 22 futures have now recovered 19 cents. The projection of the global cotton consumption for 2022/23 has decreased about 3 million bales since the first USDA estimate in May 2022. However, 2022/23 consumption is only projected to be below 2021/22 by 133,000 bales – essentially unchanged. Ultimately, demand will remain the key to price direction. A reduced supply of cotton seldom maintains higher prices without clear demand pull.
