

## ***Your Best Ortho-Phosphate Zinc Source***

When you need to be certain that zinc is available to a hungry emerging crop, **KickStand Zn 7%** should be your zinc product of choice.

**KickStand Zn 7** contains 7% water-soluble zinc for rapid availability and to offset zinc "tie up" in high pH soils.

**KickStand Zn 7%** offers superior mixability in starter solutions (ortho- and poly-phosphate starters) and is extremely stable and non-staining. No pre-dilution with water is needed. KickStand Zn 7% can be poured directly into starter solutions.

The advantages of AFT in **KickStand Zn 7%** give you extended nutrient uptake, potential solubilization of trace elements in the soil and stronger root system growth potential.

- *Mixes easily with ortho- & poly-phosphate based starter fertilizer solutions*
- *Improved zinc availability & uptake*
- *Enhanced plant root structure*
- *Excellent crop safety*
