Grains closed higher today with the exception of May corn (CK23.) Funds were net buyers of 5k soybean contracts and 2k wheat contracts while even corn contracts. Today, funds (managed money) are estimated to be short 7,437 corn contracts, long 113,404 soybean contracts and short 93,660 Chi wheat contracts.

May corn traded a two sided 12.5 cent trading range today while wheat traded an 18.50 range. In addition to weekend Russian wheat headlines, Russia surprised the market with an oil production cut of .5 mln barrels to respond to the West. OPEC added to the oil production situation with its own cut of 1.16 mln barrels through the end of the year to "add stability and support prices". In soybean trade, the market continues to digest the bullish one two punch from the US stocks and acreage report on Friday. The US is short of acres and short of stocks which will likely press the market to ration demand on the front of the market and try to buy in acres for the coming US growing season.
