

BURNDOWN DAYS

Identifying the Corn Silage Harvest Window

With all the moisture this year, determining whole plant moisture is the most important management practice we can monitor to achieve profitability.

Wednesday, August 27th

10:00 - 2:00

Hull Coop Association - Hull, IA

WE WILL BE SET-UP IN THE ELEVATOR SHOP

- Provide 4 representative stalks for testing - Fast results from Dairyland Labs. Additional testing for Nitrates, Mold/Toxins by request.
- **Steve Schwager** from **Chr. Hansen Inc.** will be there to discuss silage inoculants.
- We can also assist you in these **Key Management Areas**:
 1. Harvest Window Worksheet - Specific to your operation
 2. **Packing** Requirements
 3. Designing **Storage Structures**
 4. Dealing with **Molds and Mycotoxins**
 5. Managing **Shrink and Spoilage**
- **Shredlage---Is it right for your farm?**
- Local Agronomists and nutritionists will be on hand to answer any questions you may have.
- **Brats, Hamburgers and pop will be served**
