

January 2, 2018

**FREE DELAYED PRICING ON NEW FARM DELIVERED
CORN TO ANY OF OUR CORN HANDLING FACILITIES**

UNTIL SEPTEMBER 30, 2018

Effective January 2, 2018, we are offering free delayed pricing until **September 30, 2018** on new delivered bushels of corn to any of our corn handling facilities. Also, these bushels will not be assessed moisture drying charges, only shrink if applicable.

We are done picking up piles and we have adequate grain movement in the company. Take advantage your time and core some bins, then sell on price rally days in the future (hopefully). Here is an opportunity to move some bushels.

These policies are subject to space availability. We may suspend this program at certain times depending on farmer cash grain movement.

If you are interested in delivering corn your facility, contact your location and let us know how many bushels. These bushels will be placed on delayed pricing contracts.

If these bushels are not priced by September 30, 2018, they will be subject to our delayed pricing policies at that time. They will not be automatically sold. We will charge a 15 cent fee if not sold by September 30th, with our daily rates thereafter. This is different than previous year's policies as we want to promote getting these bushels marketed on board rallies before the 2018 harvest and free up space for next fall.

Bushels previously delivered are not eligible to be moved over to this program, this is strictly for new, off the farm, bushels. We are not calling in contracted bushels for future months.

Farmers Cooperative is an Equal Opportunity Provider.
