

Apache Farmers Cooperative

Dear Valued Customer,

As we speed towards fall crop season we have been blessed with wonderful rain fall and cooler temperatures across most our trade territory. Most of the fall crops look to provide a much-anticipated income for many farmers. The gang at Apache Farmers COOP has been working diligently to make room for those fall crops and have all our equipment in shape to accommodate.

The rise in the cattle price has been a positive among farmers and ranchers alike. The summer grazing season has been extended and early feed purchases have been slow due to an unbelievable August for fall forage. As everyone starts to purchase wheat pasture calves keep us in mind on all your Vet supplies and starter feed needs. As many of you know we have had a long-term vendor relationship with Livestock Nutrition Center out of Chickasha and handle many of their products. We have bulk feed in stock or can make on farm deliveries.

Don't forget that we also have a NAPA & Tire Store at the Apache location. Items can be purchased at that location and dropped to any of our locations for you to pick up at your convenience.

We also look forward to helping you with all your fall fertilizer and chemical needs. We know with lower grain prices every dollar counts and one must be efficient with every move made. Our goal is not only to "make a sale" it is to continue to develop partnerships and long-term relationships with our customers. We believe your gain is our gain. Send us your soil sample or allow us to come for an on-farm visit to assist you with the perfect fertilizer blend for your farm.

We have an excellent group of employees with several different areas of expertise. Contact any of our locations and allow us to assist in your operation.

Thank you for your continued support

Greg McClure
