Specialty Products

BRT Residue Digester

Moassel Nematicide

Sea 90 ~ Sea Salt

Power SC ~ Gypsum

Molasses ~ Organic Sugar

**Procidic ~ Natural Fungicide/
Bactericide**

Foliar Copper ~ Fungicide

ERGS ~ pH Reducer

BioEmpruv~ Disease Prevention

BRT Aminos~ Soil Conditioner & Foliar

Adjuvants

Bio-Lith ~ Liquid Sugar

ERGS ~ Spray Energizer

Wake Up ~ Excellent Surfactant

Combust ~ AMS/NIS Surfactant

**SafeStrike ~ Organic Surfactant,
Fungicide, Insect Retardent**

Farming for Future Generations!

Natural, Organic &
Conventional products for
raising Nutrient Dense Food
& Feed.

Healthy Roots and Great Soil Structure. BRT BioRootBuilder IF

Starters

8-18-4 w Micros

Amazing Starter is manufactured using 100% orthophosphate, aqua ammonia and potassium hydroxide.

Biological Products

BRT Bio Root Builder IF

Mix of soil bacteria fungi, Mycorrhizal and Nitrogen fixing bacteria.
Compatible with most starters.
Can be applied in seed trench or side dress

BRT Hume

Soil Biology activator.
A blend of fulvic & humic acid, carbohydrates, Trichoderma, azotobacter.
Can be applied multiple ways.

BRT AMINOS

All natural amino acid and sugar package. Use with starters & foliars.
Promotes rooting, chlorophyll production and improves stress tolerance.

Foliars

BRT Foliar PGR+

A combination of natural plant growth regs, organic carbons, Bio-lith and seaweed. Can be used as a stand alone product. Apply anytime crop is stressed

BRT R1 Seed Set

5-8-1

Forces plants to flower and be in reproductive mode.
Application June 21st and later.

V5 Foliar Micros

Helps Correct micronutrient deficiencies. Produced with sulfate forms of trace elements, organic carbons, and glucoheptonate.
Apply anytime after two leaf.

V3 Foliar Micros + PGR

Produced using our original V5 formula combined with plant hormones, natural plant growth regulators. Apply anytime after 2 leaf.

BRT Bulker

5-15-5-.25Mn

Bulker is needed to bulk the plant and initiate it into the male dominate stage of growth. Increases the density of the seed or grain. Apply after tasseling or pod/fruit set.

BRT Foliar N21

Produced by combining nitrogen, sugars, carbons, humic acids, and 100 % orthophosphate. Making it immediately available to your growing crop. Apply anytime after 2 leaf.

BRT Foliar Bio-N

Produced by combining 7 micronutrients in sulfate form with several strains of azotobacter and Bio-lith.
Apply to corn at V5 and again at R1

Legume Booster

4-12-3-3 Ca

A combination of calcium and phosphorus proven to help increase crop yields

Foliar Copper

Designed to manage plant microbial afflictions and correct copper deficiencies. Foliar Copper is a fungicide and bactericide. Apply as a preventative.

Forcing Flowering in Beans with BRT R1 Seed Set
