

Power Pro Minerals

\$1 off per bag

\$3 off per bag if you purchase 40 bags or more

Power Pro Bio Mineral R1400

Form / Feed

A vitamin-mineral supplement designed to be force-fed to stock cows during late-gestation and through calving to address potential salmonella bacteria infections in newborn calves. This mineral provides macro minerals (calcium, phosphorus, potassium, and magnesium), salt, yeast, chelated trace minerals, mannans, selenium yeast, and Vitamins A, D & E needed for optimum immunity and health.

Power Pro LGC Mineral

Form / Feed

A vitamin-mineral supplement designed for stock cows in late gestation and calving when feeding a mixture of forages. This mineral provides macro minerals (calcium, phosphorus, potassium, and magnesium), salt, yeast, chelated trace minerals, selenium yeast, and Vitamins A, D & E needed for nutrient utilization and reproduction for stock cows prior to calving.

******Other Power Pro minerals can be ordered upon request**
