

Treated Grain Handling Policy

Under NO CIRCUMSTANCES will Ag Valley Cooperative (AVC) receive (dump) any grain that is determined to contain treated grains.

Under NO CIRCUMSTANCES will AVC dump (any grain delivered in) seed tender trailers. If it is determined that treated grain has already been unloaded, the guilty party is liable for any and all costs associated with the contamination of AVC grain supplies. This could include, and is not limited to, all handling costs associated with the rejection of such grain once loaded out by truck, rail or any other like means.

Guilty parties may be asked to reload and haul away this grain, which in many instances will be larger quantities than originally delivered, due to contamination.

All AVC policies are subject to change without notice.
