

Valued Customer,

We are pleased to share an update on our ongoing efforts to strengthen and expand our grain asset network. Evergreen FS will be joining FS GRAIN as an additional member of the LLC. Evergreen FS will contribute three grain facilities, McLean, Yuton, and Holder, to FS GRAIN's operations effective September 1, 2026. This expansion reflects our continued commitment to grow strategically, enhance our merchandising capabilities, and bring greater value to the farmers and communities we serve.

What This Means for You

This change is not disruptive to current FS GRAIN customers. Instead, it enhances the network and services already available to you.

You can expect:

- Expanded asset coverage - The addition of McLean, Yuton, and Holder extends FS GRAIN's footprint further into central Illinois, creating new opportunities across a broader territory.
- More marketing and arbitrage opportunities - A larger geographic and asset network provides stronger market access, improved flexibility, and additional tools that support your grain marketing strategies.
- Continued strong service from the teams you know - There are no changes to the FS GRAIN personnel who support you today. Your contacts, service levels, and delivery expectations remain the same.
- Strengthened operational resilience - A wider footprint helps mitigate risk tied to production variability and enhances our ability to partner with customers in dynamic market environments.

This move also supports FS GRAIN's long-term strategic plan, including growth objectives and continued investments in improved systems and technologies.

No Action Required

There is nothing FS GRAIN customers need to do as part of this transition. Operations will continue as normal, and additional benefits will develop as these locations come fully online within FS GRAIN.

Looking Ahead

As these Evergreen FS locations transition to FS GRAIN, we will share updates as needed. Our commitment remains unchanged, delivering reliable service, competitive marketing opportunities, and strong local relationships.

If you have any questions, please reach out to me. Thank you for your continued partnership and your business.
