

Professional Applicator

Summer Position & Full Time Position

Holmes Agro is a progressive ag-retailer with 4 locations servicing southern and central Ontario. Our mission is to provide quality service, products and agronomic information in the area of crop inputs in order to help our customers be efficient and profitable, while being recognized as leaders in the agricultural industry. Holmes Agro strives to be a service oriented company, which sells commodities through value added techniques, thus differentiating ourselves from others to enhance the profitability of our growers. In order for us to accomplish our goals we rely on a dedicated team of individuals specializing in customer service, sales and agronomy, operations management, and professional application. The members of our team are passionate about agriculture and form the backbone of our business and the support network for our customers. As our business continues to grow we are seeking motivated, and dynamic individuals who can help us achieve new objectives for our company and our customers

Holmes Agro is seeking individuals for summer and full-time opportunities to fill the following position at our Orangeville, Redickville, Stayner and Flamborough locations:

Professional Applicator

The successful candidate will have the following qualifications:

- Have a passion for the business of agriculture and the opportunities that lie ahead for the industry
- A positive attitude and a dedication to personal improvement and skill development
- Exceptional time management and organizational skills
- Self-directed, with a professional and personal manner
- Willing to work seasonably long hours in spring and fall
- Agricultural background and an AZ or DZ license are considered assets
- Customer service oriented
- Willing to work in a fast-paced environment both as an individual and part of a team
- Confident with current computer technology and various software platforms
- Confident and comfortable with operating farm equipment and delivery trucks
- An understanding and willingness to perform preventative maintenance on equipment in order to keep equipment operating efficiently while minimizing downtime

The position will involve the following responsibilities:

- Work with the agronomy team to provide solutions using technology which will generate a return on investment for our growers and the company
- Participate in and promote a positive team environment
- Operate the company's dry fertilizer and liquid application equipment in a professional manner using all available technology to deliver product both timely and accurately leaving the customer with a positive experience.
- Maintain equipment in such a manner to optimize efficiency and accuracy as well as minimize downtime
