Happy April Fools Day

On April 29th 2010 the Burlington Cooperative Association will be holding its Annual Meeting.

April brings warmer temperatures and increasing numbers of the Alfalfa Weevil and the Spotted Alfalfa Aphid. Steve is out checking and monitoring fields daily, but the weevil and aphid infestation is growing rapidly in these warmer than normal temperatures. The newly planted fields are the most vulnerable to the Spotted Aphid, so monitor them closely. Call Steve today to schedule your fields to be sprayed. Waiting too long before treating can damage the field and the yields, even losing the first cutting the of hay in severe cases!

May 6th, 2010 Alfalfa County Musk Thistle
Program & Weevil roundup
Call the extension office at 580-596-3131 to sign up.
