Be on the look-out for Fall Armyworms, the OSU extension service had reports of heavy worm infestations in central Oklahoma about ten days ago.

So we all need to be watching our wheat fields and especially any newly planted alfalfa hay.

**Canola seed** we have it. CROPLAND GENETICS HyCLASS 115W and HyCLASS 125W.

**Wildgame Wildlife Feeders** — 300 pound capacity with a digital timer.

Are you a sportsman or just love watching the wildlife?

Stop by the scale office to see one of these feeders.

**Wildlife corn** 50 pound bags.

**October** is here and it is home heating season, so now is the time to service your heater and check your smoke detectors. With the cooling temperatures, you need to make sure your heating system is ready. Daylight saving time is normally when we are reminded to check the batteries in our smoke detectors but don't wait until November. Please check your detectors now, before you start using your heaters.

Have a safe heating season.

Check out the deals on the back
