

WILDCAT OATS

Wildcat Oats is an all new Oat variety released by Valley Seed. It was selected for its excellent forage yield potential and ability to resist lodging.

Research conducted by the University of Arizona, showed that Wildcat Oat harvested at the hard dough stage, yielded **7.3 % better than the trial mean** when compared to check varieties. Further research conducted in the Central Valley of California, demonstrated Wildcat Oat yielded **12% better than the trial mean** when compared to check varieties including Cayuse, Swan, Kanota, Cal Red, Montezuma, and Shooting Star.
