June 10th, 2025

Good morning,

Corn around unchanged, beans up a couple cents at the break. Overnight corn got into 8-month lows. Crop conditions yesterday saw corn jump up a bit from last week to 71% good/excellent from 69%. Soybeans went up 1% from 68% to 69% this week. Funds were big sellers yesterday before crop conditions came out in the afternoon. Non-threatening weather conditions, improving crop conditions weighing on the market last couple weeks. We heat up to the upper 80's the next two days before we cool off into the weekend. Scattered storms potentially this weekend.
