Good morning,

Corn and beans are both weaker at the break. US bombing Iran nuclear facilities over the weekend was the big headline. Oil prices surged yesterday evening at the open getting up over \$4 a barrel, only up 40 cents here this morning. Iran's parliament voted to shut down the strait of Hormuz. One quarter of the world's crude travels through there. The weather remains hot and sticky to start the week. Some scattered chances of showers as we get to the back half of the week. Cooler temps will roll in next week.
