July 11<sup>th</sup>, 2025

Happy Friday!

Corn and beans both down this morning. We have USDA WASDE report this morning at 11. Trump hinting at putting some blanket tariffs on several countries come August 1st including Canada. Some good rains up north last night nothing in the south. Extended forecast looks absolutely beautiful mild temps for July starting tomorrow through next Saturday. Good chances of rain throughout the entire corn belt in the 7 day most of the belt expected to get an inch+.
