Good morning,

Corn and beans both in the green this morning. Corn up around a nickel, beans up around a dime. Trump signed a trade deal with Indonesia yesterday which reduced tariffs from 32% to 19%. Indonesia has pledged to purchase \$4.5 billion in agricultural goods. Indonesia is the world's second largest importer of wheat but sources most of its wheat needs from Australia. Lots of rain chances out there the next 7 days, starting this afternoon. Potentially very heavy across our area. A couple very unseasonal low temps tomorrow and Friday as highs will be around 80 before we heat back up again next week.
