Happy Hump Day!

Corn is down a couple cents, beans up at the morning break. Soybean oil is higher overnight on improved outlook in the Big Beautiful Bill. The senate approved 45Z carbon credits for biodiesel/renewable diesel producers that use North American feedstocks. Trump announced a trade deal with India is very close to being done. A deal with Japan is not close and if deal isn't reached by July 9th tariffs will be higher. 7-day weather models looks pretty dry for central belt and eastern belt. Temps are rising as we head into the 4th of July weekend tomorrow.
