Good Mornin'

Market red across the board here this morning as no overnight bounce came after yesterday's ugly day. Crop conditions out yesterday had corn up a percent to 74% G/E and beans stayed at 66% G/E. Iowa corn is at a staggering 86% G/E pacing the way 10% above where they were last year. Illinois corn dropped 3% down to 68% G/E. Chances of storms today, we'll see if we catch something steady this time and not just a pop up here and there. Radar showing a line west of the river but looks like that might break up before it gets to us. We'll see what today brings!
