August 18th, 2025

Good Morning,

Corn and beans both down this morning to start the week off. Very quiet news cycle over the weekend. Pro Farmer crop tour begins today it will be a very active week on Ag X accounts tweeting out numbers. Temperatures will really start to drop as we get into the week which will be very welcome with our most recent heat wave we've had. Not really too much rain on 7 day model; northern Illinois and Wisconsin have best chances on good precipitation.
