September 12th, 2025

Good morning,

Corn up a penny and beans unchanged at the morning break. Another pretty quiet trade overnight ahead of today's 11 am WASDE report. Estimates for today's WASDE have the US corn yield at 186.2 bpa compared to 188.8 on the August report. Soybean estimate at 53.3 bpa compared to 53.6. Not much out there for ag news this week all eyes have been on today's report. Weather outlook remains the same. We really get into our stretch of heat today as we get up to 90 degrees. Have a great Friday!
