Copper (Cu), ppm, (Min)	180
Iodine (I), ppm, (Min)	15.0
Manganese (Mn), ppm, (Min)	670
Selenium (Se), ppm, (Min)	6.6
Zinc (Zn), ppm, (Min)	1,000
Vitamin A, I.U./lb, (Min)	55,000
Vitamin D ₃ , I.U./lb, (Min)	11,000
Vitamin E, I.U./lb, (Min)	400

INGREDIENTS

Molasses Products, Animal Protein Products, Urea, Animal Fat (Preserved with BHA and Citric Acid), Monocalcium Phosphate, Dicalcium Phosphate, Calcium Carbonate, Salt, Magnesium Oxide, Ammonium Sulfate, Calcium Iodate, Cobalt Carbonate, Ferrous Sulfate, Basic Copper Chloride, Manganese Sulfate, Manganese Oxide, Sodium Selenite, Zinc Sulfate, Zinc Oxide, Zinc Amino Acid Complex, Manganese Amino Acid Complex, Copper Amino Acid Complex, Cobalt Glucoheptonate, Vitamin E Supplement, Vitamin A Supplement, Vitamin D₃ Supplement, Mineral Oil

DIRECTIONS FOR USE

- 1) DAIRYLAND HEIFER TUB is designed for free-choice feeding as part of a balanced diet to develop dairy replacement heifers. Feed one tub per 20-30 head of heifers. This product is designed for heifers on pasture weighing 400 pounds and greater.
- 2) Place tubs within 100 feet of where animals congregate (loafing, grazing, feeding and watering areas.)
- 3) Heifers typically will consume approximately 0.50 to 1.00 pounds of this supplement per head daily.
- 4) Provide added salt free-choice or mixed in grain.
- 5) If additional mineral and/or vitamin fortification is needed, provide a nutritionally balanced mineral/vitamin supplement containing salt such as Heifer Supreme Premix.
- 6) Provide access to clean, fresh water at all times.

MANAGEMENT TOOL NOTE: Placement of tubs can influence grazing distribution in large pasture situations. Place tubs in areas of under-utilization in order to entice cattle to specific locations within a pasture.

INTRODUCTORY PERIOD: During the first week of use, place tubs within 100 feet of loafing and/or watering areas. As cattle become accustomed to tubs presence, to maintain proper consumption, some repositioning may be necessary; closer to increase, further to decrease. Do not provide free access to starved animals.

IMPORTANT: Consumption rate depends on location of the tubs with respect to loafing, grazing, feeding and/or watering areas. Also consider animal condition, forage quality and quantity, and seasonal weather conditions. If over-consumption occurs for more than two weeks, despite tub repositioning, remove tubs and evaluate the overall feeding program.

CAUTION

DO NOT FEED TO SHEEP DUE TO HIGH LEVELS OF SUPPLEMENTAL COPPER.
