

Balanced mineral and vitamin nutrition formulated to be used in lactating dairy cow rations and fed with a mixed forage blend of alfalfa and corn silage with high calcium content.

PRODUCT FEATURES

- Contains optimum levels of vitamins A, D and E; selenium; and other trace minerals
- Contains highly available inorganic sources of key trace minerals
- Increased level of cobalt, needed for multiple functions and vitamin B12
- Contains EDDI, a highly effective iodine source
- Contains Land O'Lakes Purina Feed Mineral Flavor
- Contains high quality ingredients used in a consistent formula
- Can be top dressed, mixed in, or offered free-choice
- Available with Zinpro Availa[®] 4 and COPRO[®] trace minerals at the recommended rate

PRODUCT BENEFITS

- High Performance... Provides the right calcium and phosphorus levels to balance the mineral requirements of lactating cows fed a forage program containing both corn silage and alfalfa hay or alfalfa haylage with high calcium
- Improved reproductive performance... Improved production and health
- Maximum milk production... Improved palatability ... Consistent performance
- Flexible... Fits your feeding method
- Improved biological availability to ensure optimum herd health and performance

KEY POINTS

- Formulated for rations containing a combination of corn silage and alfalfa hay or haylage and balanced with soybean meal, other protein ingredients or low levels of Land O'Lakes Purina Feed protein supplements
- Contains 7% calcium and 13% phosphorus
- Contains magnesium, a nutrient important in maintaining good dry matter intakes and muscle tone
- Contains EDDI, a highly available source of iodine
- Increased level of cobalt, an essential trace mineral for multiple function and vitamin B12 production.
- High level of vitamins A, D, and E for optimum health and performance
- High level of trace minerals, essential for top milk production, health, and reproductive performance
- Contain Land O'Lakes Purina Feed Mineral Flavor to improve cow acceptability
 - Unique blend of 34 aromatic and taste factors
 - Research proven... Increased feed consumption and cow acceptability.
