Vitamin E, I.U./lb, Not less than .....	40

### INGREDIENTS

Plant Protein Products, Animal Protein Products, Forage Products, Roughage Products (not more than 40%), Processed Grain By-Products, Molasses Products, Dried Bakery Products, Grain Products, Calcium Carbonate, Salt, Monocalcium/Dicalcium Phosphate, Sodium Selenite, Zinc Sulfate, Manganese Sulfate, Magnesium Oxide, Potassium Chloride, Ethylenediamine Dihydride, Cobalt Carbonate, Basic Copper Chloride, Animal Fat (Preserved with BHA and Citric Acid), Vitamin A Supplement, Vitamin D3 Supplement, Vitamin E Supplement, Mineral Oil

### FEEDING DIRECTIONS

This supplement is designed to be fed to cattle at the rate of 1 to 2 lbs/head/day. This supplement may be top dressed over feed in the bunk or mixed with grain and/or roughage prior to feeding. Provide sufficient bunk space so all cattle can eat at the same time. Cattle should have access to fresh, clean water at all times.

## Available Additives:

Product No.	Options	Active Drug	Active Drug Level
1690210	NM	Non-Medicated	None
1690211	R400	Rumensin	400 g/ton
1690212	B500	Bovatec	500 g/ton
1690216	H-0.4	MGA	0.4 mg/lb
1690215	CTC140	CTC	140 g/ton
1690217	R400	Rumensin	400 g/ton
	H-0.4	MGA	0.4 mg/lb
1690218	B500	Bovatec	500 g/ton
	H-0.4	MGA	0.4 mg/lb

**Product Features:**

38% Protein, no NPN

4-5% Calcium, 0.8% Phosphorus

Adequate phosphorus for growing animals without being excessive

100% vitamin and trace mineral fortified

Available with various levels of different approved feed additives

**Product Benefits:**

All natural protein to meet protein requirements for lean growth and frame development; uses vegetable proteins and approved animal proteins

Balances moderate grain/high roughage rations

Optimizes animal performance while reducing environmental concerns with manure management

No need to feed extra mineral supplements to meet requirements

Wide range of options allows diets to be targeted for specific feeding situations, improving feedlot performance

**Usage Tips**

SteakMaker Grower 38-0 is a protein, mineral and vitamin supplement for growing or backgrounding cattle fed a moderate to high forage based ration. This supplement is typically fed at 1.0 to 2.0 lb/h/d depending on the nutrient profile of other ration ingredients, ration energy content, age and size of cattle being fed and the medicated option used. Typically, rations with some alfalfa or barley will need only 1.0 lb/h/d, but rations with corn, milo, silage, and grass hay may need a higher level of supplementation.

SteakMaker Grower 38-0 can also be fed in combination with NPN containing liquid supplements to build growing rations with the conditioning benefits of liquid while formulating for optimal levels of NPN and natural protein.

All ration adjustments should be made on a gradual basis. Use good bunk management techniques and procedures to prevent digestive disturbances and optimize dry matter intake and animal performance. Medicated SteakMaker Grower 38-0 supplements should be thoroughly mixed with grain and roughage. Follow label directions for mixing instructions.

For best results, a feeding program using Land O'Lakes Farmland Feed beef ration balancing program(s) should be developed.

**Key Points**

1. The amount of ration consumed should be considered in determining the proper level of additives to be fed.
2. Ideal for moderate to high forage growing and backgrounding rations.
3. A highly palatable supplement with no added urea. Ideal for young calves and situations where producers prefer not to use any urea or animal protein containing supplements.
