

CruiserMaxx Plus: Offering More Convenient, Enhanced Disease Protection

Syngenta Seedcare, the company that introduced CruiserMaxx® Beans, the first commercial insecticide/fungicide seed treatment combination on the market for soybeans, now has merged the power of CruiserMaxx insecticide/fungicide premix with the added benefit of additional disease protection in one simple, convenient product. CruiserMaxx Plus insecticide/fungicide seed treatment for use

on soybeans is a formulation in the CruiserMaxx Beans brand family that combines all the advantages of CruiserMaxx, plus a higher rate of mefenoxam (Apron XL® fungicide) to provide increased disease protection against troublesome seed- and soil-borne diseases such as *Pythium* and *Phytophthora*.

A comprehensive formulation, CruiserMaxx Plus offers a more convenient way for retailers to apply the market-leading soybean insecticide/fungicide seed treatment brand while still offering grower customers the most effective early-season insect and disease protection on the market.

CruiserMaxx	CruiserMaxx Plus
Use Rate – 3 oz/cwt. (1,280 units/15 gal keg)	Use Rate – 3.2 oz/cwt. (1,200 units/15 gal keg)
Delivers 0.16 oz of Apron XL per cwt.	Delivers 0.32 oz of Apron XL per cwt.

BENEFITS of CruiserMaxx Plus

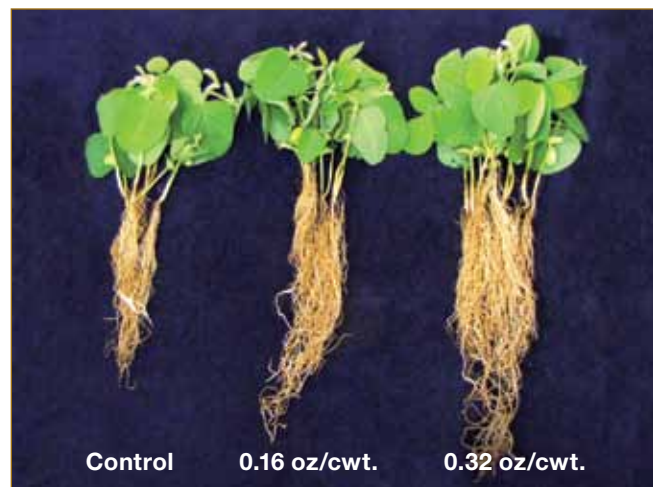

- Offers a more convenient way to apply the market-leading soybean insecticide/fungicide seed treatment brand.
- Same active ingredients as CruiserMaxx (thiamethoxam, mefenoxam and fludioxonil).
- Delivers a higher rate of mefenoxam (0.32 fl. oz/cwt.) than the standard CruiserMaxx premix (0.16 fl. oz/cwt.).
- Additional mefenoxam (Apron XL) provides added protection against *Pythium* and *Phytophthora*.
- Can be used with rhizobia inoculants.
- Excellent activity against a broad spectrum of soil-dwelling and foliar-feeding insect pests.
- Helps increase plant stand, uniformity and vigor, and protects yield potential.

Insect Protection

- Soybean aphid
- Bean leaf beetle
- Seedcorn maggot
- Wireworm
- White grub
- Grape colaspis
- Leafhopper
- Three-cornered alfalfa hopper
- Thrips

Disease Protection

- *Pythium*
- Early-season *Phytophthora*
- *Rhizoctonia*
- *Fusarium*
- Seed-borne *Sclerotinia* (white mold)
- Seed-borne *Phomopsis*
- General seed rots

Soybeans with treatments containing increasing rates of mefenoxam for *Phytophthora sojae* protection.

By incorporating the trusted CruiserMaxx premix with a higher rate of mefenoxam for superior disease protection, CruiserMaxx Plus offers a simple and convenient formulation that allows retailers to offer their grower customers improved plant stands, increased plant vigor and ultimately a better chance for higher yields.
