

**PRAIRIE LAKES**

Dear Valued Customer:

Thanks to everyone's efforts, we were able to keep our customers supplied with propane this winter.

While other propane retailers were unable to access adequate supply to serve their customers, we continued our track record of providing a safe, dependable propane supply despite challenges caused by extended cold weather, pipeline changes and other industry factors.

Looking ahead, we know that propane demand will soon begin to heat up again. Please consider locking in a propane contract rather than doing "call in," so that we can better plan to meet your needs.

Working together, we can help make sure that everyone has the propane they need, when and where they need it. We thank you in advance for being part of the solution, and we pledge to continue doing everything we can to meet your upcoming needs.

Below, you will find three contracting options. Please call the energy department to enroll in your 2014-2015 propane contract.

Sincerely,

Steve Gorder, Energy Manager

Equal Payment Plan - 12, 11, or 10 month	This option is a monthly equal payment plan. We fill your tank automatically, based on your 5 year history, until your planned gallons run out. We offer a 12, 11, or 10 month plan. To qualify for the 12 month plan you must enroll by June 15th, the 11 month plan by July 15th, and the 10 month plan by August 15th. All equal payments end May 31st. Price is locked in the day you enroll in the equal payment plan.
Traditional Plan	With the Traditional Plan, you lock in your price based on what price it is that day. You will determine your gallon usage based on your 5 year history or your proposed gallons. You pay \$.30 down per gallon the day you sign up and then pay as your tank is filled.
Full Prepayment	If you pay a full prepayment for your contracted gallons, you will get a \$.05/gallon discount.
