

# Wheat MAXX

When compared to soybeans and corn, wheat is more directly used by the consumer and less resilient to disease. Therefore, quality wheat is of high importance to meet the needs of the local and global consumer. It is Legacy's belief that these programs will promote the production of high quality wheat at harvest. Participants in this program will purchase Prosaro Fungicide from Legacy Farmers and receive free drying up to 20% moisture.

## Prosaro Fungicide

- Fights scab
- Protects against various diseases (rust, blotches)
- Rainfast in 2 hours
- Potential increase of 13.4 bu/acre\*
- Bayer ROI / Yield Calculator:  
<https://www.cropscience.bayer.us/products/fungicides/prosaro/roi->

## Wheat MAXX *Plus Seed*

- Purchase new, treated seed wheat and/or wheat seed cleaning and treating from Legacy Farmers
- **Receive a credit of \$2.50 per acre** to be applied towards custom application of Prosaro or the Wheat Intensive Crop Management Program.

## Summary of 2015 Prosaro users

- 34% lower vomotoxin levels
- Potential return on investment up to \$36.35/acre

## Summary of 2016 WheatMaxx Program

- High quality for all wheat
- Potential return on investment up to \$10/acre

## Program Changes for 2017

- Shrink only with no drying charges up to and including 20% moisture
- At the start of harvest, test weights of 56.5 and above will receive no discount

Calculations for ROI based on: 85 bu/acre average, Price of \$4.50 bu, Yield increase of 7bu/acre, Combined difference in discounts. \*Potential yield increase figure from Bayer's yield data
