A DA BASE

In the middle of the 20th centure the main pivotal of the planning structure of Shokhrud chanal in Bukhara has been concealed. The original appearance (look) of this canal as well as the architectural ensemble of Lyabi Khovuzi Nodir devonbegi, trade domes of Toki Sarrofon and toki telpakfurushon with surrounding buildings have been restored in Uzbekistan from 1975 to 1994. These designing restoration works have been done by Uzbek Ministry of Culture.

Building Type

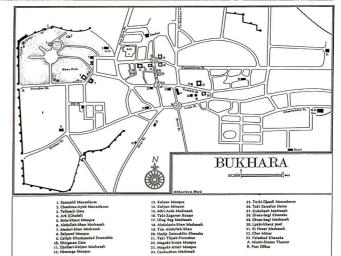

072 711.UZB

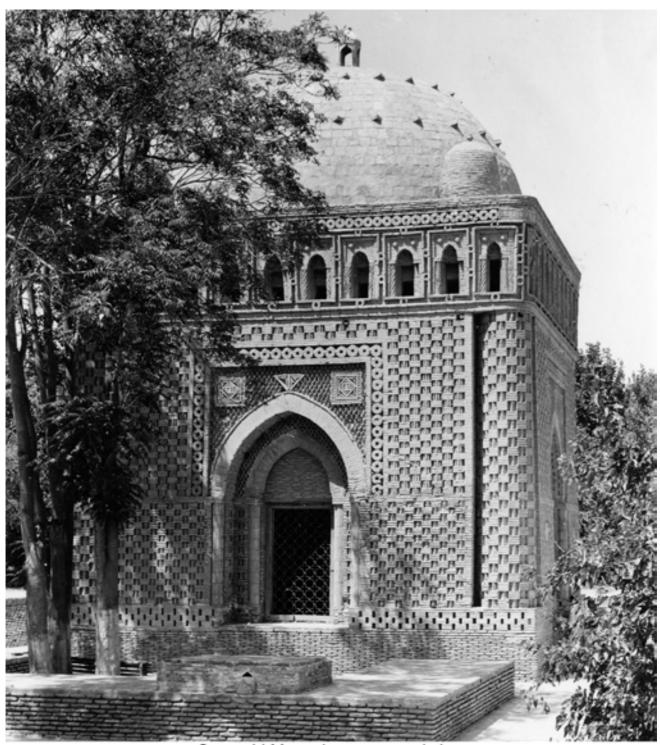

To reach the integrity of the central architectural ensembles in Bukhara it was necessary to take down some late buildings distorting the view of the historical

The original look (appearance) of Shokhrud canal improved the microclimatic conditions. The clearing of façades of caravanserais which are in the centre of the city as well as small mosques creates the effective background for the architectural monuments.
