CONTENT

MAY THE CONTENT

BE WITH YOU

LONG-FORM CONTENT

Long-form, comprehensive content (2,000+ words) just ranks better in Google search.

POWER PRACTICE PAGES

Pages that focus exclusively on your practice area and follow this framework:

-  One page per practice area
-  2,000+ words
-  Contain purchase-intent keywords
-  Contain related (LSI) keywords
-  Be more comprehensive than other similar sources of content on the internet.

EXPAND YOUR POWER PAGE

Expand your Power Page
with the following tactics:

PERMALINKS

(THE STRUCTURE OF YOUR URLS)

Your permalinks should:

-  Contain the target keyword phrase for this page
-  Be short and easy to read
-  Follow a logical hierarchy
(i.e. example.com/houston/personal-injury-attorney)

03

LOCAL

Proximity is still the #1 ranking factor for Google My Business listing results

TOP LOCAL RANKING FACTORS:

- 1 RELEVANCE
2. DISTANCE
3. PROMINENCE

The more consistent data
you have about your firm on
Google and the internet, the
better it will rank in local results.

RELEVANCE

Choosing an accurate category

Choosing a good destination URL for your GMB profile

Using target keywords in your GMB

Service and practice area descriptions

DISTANCE

How to rank well for your location

The location needs to be staffed during business hours.
(you can't just rent an office and have it locked all day).

The staff has to be yours
(not a virtual office service i.e. you do their payroll)

Do not share an office with another attorney
(filtering issues).

Do not use virtual office services or coworking space.

Have permanent signs visible from street view.

Our preferred review tool is Podium.  **PODIUM**

Make sure you respond to reviews everywhere,
