

Start of Spring Semester

We're back in the saddle again with the start of another semester. It's a busy one for our graduates as they approach the finish line of stateside training. They've had classes in Missionary Technology and learned about solar panels, water filtration & more; Phonetics & Phonemics, and are currently studying Evangelism & the Developing Church - very critical when planting churches in a cross-cultural context. More pertinent classes to come.

Woven through their 4 semesters is the spiritual emphasis of walking with the Lord, enabling spiritual growth which will keep them close to the Lord in the midst of the most challenging of circumstances - of which there are *MANY* as they cross oceans, languages and cultures.

Our ELINC (mentoring) group gathering together after Christmas break

We're so thankful for your interest in what God is doing around the world to engage the edge with the Gospel of Christ

Praise and Prayer

Praise God for our students and our privilege to serve Him
Please pray for our students to finish well and that we are effective in training them
