

Regular classes are out; Linguistics and Greek classes are in.

While a majority of the students have gone back to their home area, two groups of students press on with specialized training here at the MTC.

It's a blessing to offer these classes to better equip them with tools such as linguistics - a skill needed to translate unknown languages into an alphabet to be used to help people groups learn to read and write their own formerly unknown language, but Greek as well - to better translate the Word of God with the root meaning of scripture in the bible.

We are ever thankful for the privilege of serving the Lord at the MTC, and ever grateful for the folks and churches who give to make this a reality.
