

PARKING LOT SAFETY

Traffic through the parking lot is one-way. Students should always be with a parent while walking to and from the building. Please do not allow children to walk on the stone walls, in the mulched areas, or in the memorial garden near the gazebo. Parking spaces near the front of the building are designated for families helping each other during arrival and dismissal (waiting with younger children in the vehicles) or for families with infants. Families are discouraged from leaving cars idling while waiting during drop off and pick up times, except during extreme cold and hot temperatures. Parking in the 3 handicap spaces requires a legal handicap tag.

The parking lot is busier than ever this year and safety, particularly for the children, is a major concern. Traffic should travel in a one-way direction around the lot as seen in the diagram. Following this pattern will minimize potential conflicts between vehicles and pedestrians in the lot.
