

NEIGHBORHOOD CARE GROUPS

In response to the new limitations and recommendation for Seattle in regards to COVID - 19 we are forming Neighborhood Care Groups. These groups will function to maintain connection between people in close proximity to one another to facilitate care and community. We have divided the spaces OneLife Community Church families live and move in into 9 smaller region/neighborhood areas. Each of these will have at least one point person who will oversee making sure the needs of people in that region are being met specifically in terms of connection and community.

HOW WILL THESE GROUPS FUNCTION?

The Neighborhood Care Groups are not going to be gathering the same geographical space. Instead there will be emails, texts, video conferencing, and check-ins to make sure that everyone is flourishing, and able to have relational connections, share needs, pray together, and be the body of Christ together. You can expect to get an email or phone call from one of the point people in your neighborhood within the next few days. If you are willing to be a point person in your neighborhood please contact Greg Di Loreto at greg.diloreto@gmail.com, or (206) 715.5747. We firmly believe that the church is more than capable of navigating the challenges of these times. We also believe that staying connected in Christ, looking out for one another and the people around us is one of the ways we will do this.
