

SCRATCH-LITE AQUARIUM

You can find this video link on the SCA website under the tab **Student Links** followed by **Art**. Then look for your grade & click on the **Scratch-Lite Aquarium** project link. There you will be linked to a youtube video. Students, before you watch the video, please know there are a few adjustment we will make to what you will watch on this video. They are:

1 – I will cut 3 pieces of Scratch-lite film for the 3 fish we will be making.

2 – We will glue each fish onto a separate scratch-lite film

3 – We will create an aquarium with plants and air bubbles.

Watch the video & answer the following questions:

1. The tools we will be using to create our Aquarium are
 - a. _____-lite film.
 - b. A _____
 - c. _____
 - d. Glue

Step 1 With a wood scratch _____, scratch an _____ fish body

Step 2 Scratch a line for the _____ and a _____.

Step 3 Add _____, and a _____.

Step 4 Add details, such as _____ on the fish-body and fins

Step 5 Cut out the fish

Step 6 Create 2 more fish using different fins and patterns

Step 7 Create a home for your 3 fish on a whole piece of scratch-lite film by adding plants and sand at the bottom.

Step 8 Glue on your fancy fish in a pleasing manner.

Step 9 Create air bubbles by scratching circles in from of the mouths of your fish. No more than 3 bubbles are needed.
