

## Glenn & Sherri McGhee Ecuador, South America

June 2022

Terms like: "Back against the wall, under the gun, up a creek, up against it" might be used to describe how we feel trying to get the facilities ready for our first youth camp. August 1, 2022 is just around the corner! Sherri has been busy buying all the stuff for the kitchen, dad has been busy with the construction and I have been busy spending money like it grows on trees (another applicable term)!

Just when you think there is not enough time or not enough money, God pushes the pause button to show you what He is capable of. After all He has been organizing, supplying and making things happen for much longer than we have!

Two men from our church in the mountains called dad and asked if they could come to the camp and help out for a week. Luis is an electrician and Angel a plumber. What a blessing they were. All the toilets, showers, sinks and faucets are in place. All the lights are up in the Dining Hall and the Sports Center!

Instead of having our "backs against the wall" we are now "on top of things". Yes, there is still a lot to be done and yes we still need money to finish, but the great reminder that God is still in control is making each day a fountain of blessings instead of a "trip up the creek without a paddle". I can't wait to give you the report in August of the teen lives that have been changed because of your investment in Ecuador and Camp La Victoria!

In His Service,  
**Glenn**
