

# THE BUNNELLS

Rescuing the Dying. Building the Local Church. Global Vision.

## Furlough

Over the last several months we have visited supporting churches. Visiting supporters who have partnered and prayed for almost twenty years in some cases has been both encouraging and refreshing. Meanwhile, in London, our churches have held together. The youth group continues to develop and grow in our absence. While attendance has slipped a little, we anticipate an exciting and well attended Easter Sunday. Many people in our church are sending us letters and excited about our return, and we can't wait to see them again. Thank you for standing with us.

## Eurasia

We are excited about upcoming summer visits with ministry partners in three different areas of the world: the Horn of Africa, the Caucasus, and the Balkans. In each of these areas, dynamic Christian leaders are working to build strong churches, make disciples, and secure freedom to worship God. As they do this work, some of them are risking everything. Pray for them.

## Revitalization

*Churches all across America are in need of being brought back to life. Buildings and congregations everywhere are slowly declining. The picture taken above is from a small town in the Southern United States. We often think of the decline of Christian faith in Europe, but the same thing is happening in America. The greatest need in world missions for the American church is to be revitalized in its service of the living God - 1 Timothy 4. We have been burdened by how many churches are in decline or stagnant. Please never underestimate the part that you play personally in the total work of world evangelization. Without your prayers and support, missionaries cease to exist.*

Since 1999, the Bunnells have helped to plant or revitalize 7 congregations in 4 cultures. Andrew has traveled in 40+ countries. Sarah has a background in music and languages. They are parents to Joey, Jack, and Lizzie. Their London church is close to the fast growing Crystal Palace area.
