

May 2019

Explorers Newsletter!

Dear Parents:

How can it be May already! This school year has sped by and we have enjoyed spending it with your wonderful children. Thanks for sharing them with us!

During this last month of school we will concentrate on exploring water. That study will include making flax goop, making mud and also making bubbles. We will also water paint and play with sponges. There are many Bible stories about water that we will concentrate on as well.

We wish all of the Mom's a very Happy Mother's Day on May 12. Our last day of preschool for our Monday class is May 20, and for our Tuesday class is May 21.

This year has been so much fun and we have loved watching your children run, play, build, read, cut, write, color, paint, climb, sing, socialize, laugh, learn and pray. We pray that you have so many future blessings with your children and your loved ones!

Blessings for a fantastic and safe summer!

Hugs from Mrs. Doerr and Mrs. Kusmin
