

AT THE MOVIES

JUNE 24

JURASSIC WORLD

INTRODUCTION

As the incident at Babel shows, it's humanity's tendency to dethrone God to pursue their own destructive agenda of self-independence.

Meaning, purpose, and redemption cannot be found in our own self-reliance, independence, or technology, but only in God.

DISCUSSION QUESTIONS

1. Tell us about a time your child (or a child) mimicked one of your unsavory behaviors?
2. Read **Genesis 11:1-9**. For what purposes did the people desire to build this city & tower? Why do the people desire a tower that "*reaches into the sky?*"
3. Is all technology good? How has technology helped you? How has it hurt you?
4. Why is complete personal independence such a popular quality today? How is it good? How is it bad?
5. How is it possible to say that we need God, while just using him to get what we want?
6. How can you lean more on God and others this week?

MOVING FORWARD

Anytime we put something before God it's dangerous. Even though the actual item or accomplishment may not be wrong, when we use them to give us self-worth, we set ourselves up for failure. Things will give you temporary fixes, but nothing can permanently replace God. What towers have you built in your life?

CHANGING YOUR MIND

*Some nations boast of their chariots and horses, but we boast in the name of the Lord our God.
Psalm 20:7*
