July

2026

Road to GCE center

We experienced two strong earthquake aftershock in General Santos where our ministry is located. The highway is totally destroyed so we are going through the Muslim area to go to our center. Every vehicle that passed through the property has to pay a toll. It'll be a while before the road can be fixed so we will be paying the toll every day.

A highway connecting to our ministry center that collapse after the earthquake. I am standing on a muslim private property. The only option to reach our center.

Relocation of ministry office

We have been very busy relocating our ministry office near to the city and hospital. The ministry center is up in the mountain where we work with the unreached peoples group. It's too dangerous for Sharon to stay overnight in the mountain because of the rebels, so normally she sleeps in the office in the foothills.

City Preschool

We have been very busy relocating our ministry office near to the city and hospital. The ministry center is up in the mountain where we work with the unreached peoples group. It's too dangerous for Sharon to stay overnight in the mountain because of the rebels, so normally she sleeps in the office in the foothills.

Fruition of Coffee

Please pray for the fruition of the cherries for the coffee. We believe that God has given us this Coffee likelihood to sustain our ministry and the Ministries of all the outreaches in the unreached mountains. The past 3 years, the coffee flowers keep dropping and no cherries seen, and we have found a solution to this problem by adding more potassium sulfate in the soil. Please pray that it works because we really need the income to support our many Gospels outreaches.

Bible Studies

This year we are doing Bible Studies to 60 couples. Please pray for their salvations. 40 unsaved in Muslim Mindanao and 80 unbelievers in Cebu squatters.

Pastor Manny

Please pray for the lord to strengthen Pastor Manny lungs, to withstand the constant burning to make charcoal in the mountains and the burning of garbage in the evenings. It has caused alot of phlergm build up in his lungs. We pray strength and restoration.

In his vineyard,
Sharon and Manny Pastre
