

# S.H.I.E.L.D Helicopter

## Materials

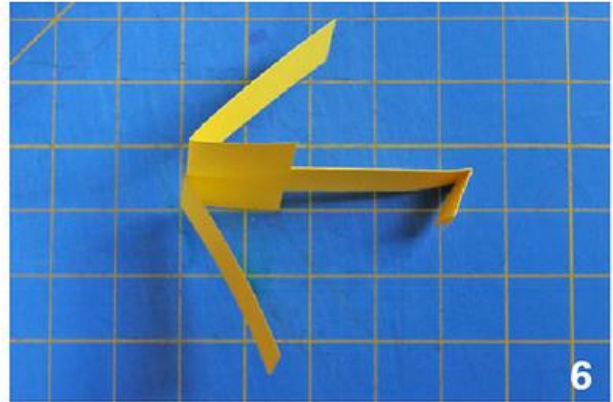

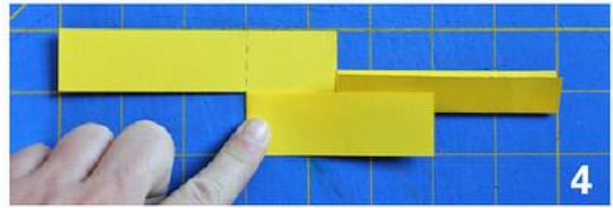

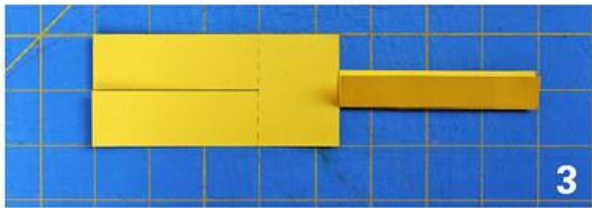

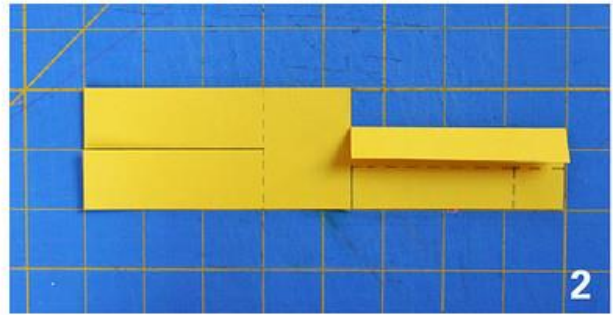

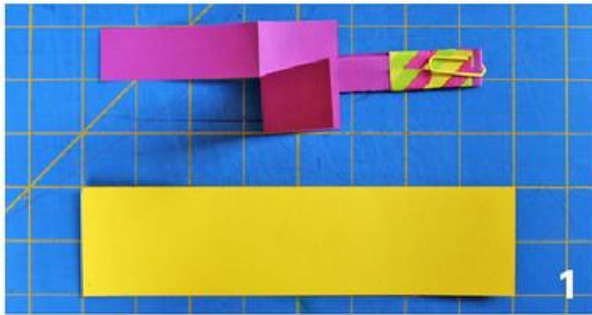

- Construction paper or card stock
- Paper clips
- Tape
- Scissors

**Guide:** At first I was a little concerned that most of the templates I found for paper helicopters did not include measurements. Then we started experimenting with making them different sizes and the fun really began. We actually found that the bigger they were the better they flew. A 2" by 8" piece of paper was just right. Here are the proportions we used, you can increase or decrease them as desired. **Cut along all solid lines. Fold along dotted lines as shown in the next steps.** You may want to lightly score the dotted lines to make folding easier.

## Instructions

- **Step One** Cut your paper and draw guide.
- **Step Two** Fold section D along long dotted line
- **Step Three** Fold Section C along long dotted line
- **Step Four** Fold Section A along dotted line towards you
- **Step Five** Fold Section B along dotted line away from you
- **Step Six** Fold bottom edge of section C/D towards you
- **Step Seven** Tape folded end of C/D *I couldn't resist adding a little flair with some decorative tape.*
- **Step Eight** Add a paper clip to the taped end

You're done! Take them outside and throw them like you would throw a ball or paper airplane. They should spin like a helicopter to the ground! If you feel comfortable, you can take your group to the stairs on the outside of the building and drop the helicopters from the top. They should spin all the way to the ground!
