

PRAYER
Matthew 6:11-13

Over the past few weeks, we have been studying Jesus' teaching on prayer. Some of the points we have seen include:

Prayer is not a means to impress others

God sees us when we pray

“Churchy”/longer prayers do not result in better or more effective prayers

God knows what we need

God answers requests that further His kingdom and His glory

God is a good, He is for us and He graciously gives to us good things

Our prayers should begin with an acknowledgement of the relationship between God and us

Were any of these thoughts/points new to you? What, if any of them, encouraged you?

Have your prayers changed, over the past several weeks, because of anything you have learned in this series?

This week, we learned that an area of focus in prayer should be a request for our daily, physical needs.

Has there ever been a time when God has provided for a need about which you were praying?

What is the significance of praying about our daily needs, as opposed to future needs?

Do you tend to worry about things you think you will need in the future and do not yet have?

Next week begins a new sermon series.

Are there any lingering questions that you have about prayer?

Was there an issue related to prayer that you wish was discussed in a sermon?
