Message Notes

This image shows a single sheet of white paper with horizontal blue or grey ruling lines. The lines are evenly spaced and run across the width of the page. There are approximately 20 lines visible. The paper has a slight shadow on its right side, suggesting it's resting on a surface.

The chicken house project at Neema House is moving forward! The primary goal is to produce and sell eggs and chicken manure to generate sustainable income for the operations of Neema House Tanzania. Local food security will improve as well. Eggs and chicken manure are easy to sell in the local markets. The plan is to start with 1,000 egg-laying hens.

Due to the ongoing conflict in the Middle East and its impact on global supply chains, the cost of many goods in Tanzania increased significantly. Considerable time was spent researching suppliers and comparing prices in an effort to stay within the approved budget. Cages were obtained at the end of July, and they were assembled and installed at the beginning of August.

Placing the initial order for Hy-Line Brown chicks will occur soon. If everything proceeds as planned, the chicks should arrive at the end of September.

Thank you for all of the support given in helping establish an income-generating project that should become increasingly self-sustaining.
