

PROGRAMMATIC IMPACT OF EXPANSION PROJECT

Second Floor

**Workshop Room—repurposed**

This space becomes available as a designated workshop room, where women will participate in workshops on financial literacy, domestic violence, and more to enhance emotional well-being.

**Resource Center—repurposed**

In this room, women and children can study and access books. The space will be lined with bookshelves and will include comfortable seating.

**Children’s Center—enhanced**

A bathroom in the toddler’s room means that staff will not need to exit the room when the little ones need to use the bathroom.

**Wellness Center—new**

We’ll have a new space to offer physical fitness activities to combat obesity, diabetes, asthma, etc. We’ll offer martial arts, yoga, meditation, and other classes to women and children and have space for job fairs, college fairs, and other large-group activities.
