

## **A-120 FURNACE LEFT OR RIGHT \$6,009**

The Keystoker A-120 Add-On Furnace is made from heavy gauge American steel and has an insulated metal jacket. It burns anthracite rice and buckwheat coal. And since this furnace used clean burning anthracite as fuel, you do not need to worry about enlarging your carbon footprint to fulfill your heating needs. All surfaces that are in contact with hot gases are wiped with air from convection blower to exhaust maximum amount of heat from furnace.

- **Produces up to 120,000 BTU's**
- **Automatic coal burning**
- **Produces very little pollution. Furnace is heated with our patented flat grate stoker. Comes complete with necessary controls and thermostat**
