

McCook Memorial United Methodist Church

Systems Technician

The **Systems Technician** will be responsible for development, set up, troubleshooting, documentation and training for the worship technology of the McCook UMC. Systems will include but not be limited to: sound board, computer visual center and recording / streaming systems.

Main responsibilities include:

- Develop an expert understanding of all systems.
- Ability to set up and troubleshoot systems for routine problems. May be involved in basic installations.
- Document procedures to supplement training.
- Train volunteers in proper use of equipment and new technologies.
- Recruit volunteers to assist with services.
- Worship attendance is not required but periodic attendance is preferred. Must be available if problems occur with the equipment.

This position is paid on an hourly basis. A weekly retainer may also be part of the compensation package. Pay will be determined based upon knowledge and experience.
