Interested in the Gateway Conference Bookkeeping Program?
Using Aplos already and have questions?

Join Conference Bookkeeper Chiyo Palen for this Q&A roundtable. Whether you've been using Aplos for a while now or if you're considering moving to this accounting software that is specifically designed for churches and not-for-profit organizations, Chiyo can answer your questions.

The #1 online accounting choice for churches.

Good stewardship starts with good accounting.
That's why fund accounting is an essential part of church management.

I'M A CHURCH

Bookkeeping can be much simpler if you use accounting software built for churches.

Easily accomplish daily tasks like:

- Managing donations
- Tracking money in designated funds
- Creating nonprofit reports

That's why more organizations from more than 100 countries choose Aplos.

I WANT TO WORK FASTER

Save time on your accounting so you can spend more time on your mission.

- Create contribution statements in minutes
- Import transactions directly from your bank
- Automatically track donations in your accounting
- Accept recurring gifts online
- Avoid workarounds needed with a business software

That's why users that switch from QuickBooks say they save valuable hours every week.

I WANT IT DONE RIGHT

Rest easy that your accounting and donations are correct.

- No accounting skills are necessary
- The software does the hard work for you
- Free unlimited support and training
- Same security as banks
- Easily manage the books of more than one organization if needed.

That's why 97% of our customers recommend Aplos.

Made for the needs of churches.

Why churches choose Aplos over QuickBooks.

Aplos is created specifically for nonprofits and churches, not small businesses, which means it allows you to easily:

- Manage your finances with true fund accounting to track designated funds.
- Track giving by individual for those manually entered by batch or accepted online.
- Generate contribution statements and robust reporting for all your needs.

Strong Internal Controls

You can rest assured that your organization is protected with built-in internal controls. Role-based permission levels enable you to control who accesses various sections of the software and share responsibility other users. You can also share free access with your accountant or auditor. You can see the user activity log for transparency and lock down transactions after completing a bank reconciliation to ensure your records are not altered.

Frequently Asked Questions:

Does Aplos offer payroll?

Yes, Aplos integrates with Gusto. You can manage all your payroll needs, they file your W-2s and taxes on your behalf, and you can sync with Aplos to automatically track your payroll, taxes, and withholdings in your accounting.

What reports will I have?

You can create and export a number of templated reports that follow FASB guidelines including the statement of financial position (balance sheet), statement of financial position (income statement), statement of functional expenses (fund balances), and general ledger. You can also create custom reports you need by using tags to track income and expense for specific campaigns or projects.

How secure is your software?

Aplos uses the same level of security as your bank and follows PCI Compliance guidelines. Every piece of information you share with our system is securely transmitted using a verified, high-grade security certificate with 256-bit SSL encryption.

Made for the needs of nonprofits.

Why nonprofits choose Aplos:

Aplos is created specifically for nonprofits which means it allows you to easily:

- Manage your finances with true fund accounting to track designated funds.
- Track donations by donor for those manually entered by batch or accepted online.
- Build custom, granular reports by project, campaign, or department.

Aplos users also enjoy free, unlimited support for set-up assistance, training, and ongoing support by the award-winning support team. This ensures a smooth transition and confident accounting moving forward.

Do I Manage Multiple Entities?

If your organization is needing to manage accounting for multiple entities you can easily accomplish this through Aplos Oversight. This setting in your Aplos subscription allows you to set up accounts for each of your entities under one umbrella so you can quickly check the health of your organizations, monitor user activity with built-in internal controls, and access each set of books.

Frequently Asked Questions:

Does Aplos offer payroll?

We offer integrated payroll through our partner, Gusto. Gusto offers a convenient and simple full-service payroll software, including payroll processing, payroll tax administration, and direct deposit.

What reports will I have?

You can create and export a number of templated-reports by fund that follow FASB guidelines, including the statement of financial position, statement of functional expenses, and several dozen prepared reports. You can also create custom reports you need by using tags to track income and expense by fund for specific departments, campaigns, or projects. Also, you track your budget by fund to create reports that compare budget to actual spending.

How secure is your software?

Aplos uses the same level of security as your bank and follows PCI Compliance. Every piece of information you share with our system is securely transmitted using a verified, high-grade security certificate with 256-bit SSL encryption.
