Mission News: Premier Choice for Women (Longview)
Recently Premier Choice received a grant from a national organization that provided a new ultrasound machine plus training in its use. The new technology enables greater clarity and detail of the early stages of life in the womb so women can see they are carrying a child, not just "a clump of cells". The entire Premier Choice team has received the evangelistic training; there has already been a positive impact: a couple came to faith after their ultrasound experience.
