2024 American Heart Month

February is American Heart Month. A person dies every 33 seconds from cardiovascular diseases. That equals to one out of every five deaths in the US. Heart disease is a killer that strikes more women than men and is more deadly than all forms of cancer combined! African Americans experience more than any other ethnicity when it comes to heart disease. This is usually due to obesity and hypertension. What are you doing or what will you do to take care of your heart?
